Abstract

Researcher : AL taieb Ahmed Abdul Samad AL shenqiti.

Title : " Educational Stiles in development of faithful values for Moslem youth on the light of prophetic sunnah ".

Objective : to illustrate some prophetic Educational styles that lead to development of faithful valves of Moslem youth .

Methodology : Descriptive deductive methodology.

The research chapters : **Chapter one :** the plan which includes: (introduction, study subject, inquires, objectives, importance, methodology, limitations, terminology, and previous studies)

Chapter two includes: the definition of youth and it's time period, the importance of youth in Islam, characteristics and Educational requirements of youth age.

The meaning of modern challenges, the goods of modern challenges, the most prominent challenges that face Moslem youth ways of face these challenges.

Chapter three includes: the general definition of values, characteristics of Islamic values, classification of Islamic values, the faithful values to be developed .

Chapter four includes :selected prophetic styles to develop faithful values of Moslem youth and the extent of it's benefit in our modern age, it includes "

(the exemplar - the discourse - sermon and consideration -the story - desire and punishment - mention of examples – punishment- mental persuasion - competence - events)

Results:

- ١- prophetic sunnah is the right methodology and the ideal Educational style on which prophet's companions were brought up.
- ٢- The development of faithful values of Moslem youth is an urgent need for Moslems personality building .
- ٣- exemplar is the greatest style affects human self.
- ٤- Discourse, story and mental persuasion are the most successful educational styles .
- ٥- Desire and punishment is a treatment style to evaluate human self, to guide it for the right way.

Recommendations and suggestions:

- ١- Educational and Governmental institutions must perform training programs to prepare youth for facing their issues with solutions that promote their faithful level.
- ٢- Researchers in the educational field of youth must hold researches built on previous designed fundamentals aiming at solving the youth problems especially in faithful sides.
- ٣- The importance of diversity in development styles of youth values, methods of presentation, its utilization with modern technology.
